Kemal Kayankaya The Evolution of Rhythm Cognition: Timing in Music and Speech Experiencing Musical Time Rhythmic Patterns in Neuroscience and Human Physiology Diversity Dimensions in Mathematics and Language Learning The Handbook of Neuropsychiatric Biomarkers, Endophenotypes and Genes What we learn and when we learn it: sensitive periods in development Bulletin der deutschen Slavistik 2024 Como Proust pode mudar sua vida *Jakob Arjouni Andrea Ravignani Kristina Knowles Daniela De Bartolo Annemarie Fritz Michael Ritsner Etienne De Villers–Sidani Daniel Buni Alain de Botton*

de vier kayankaya detectives waarmee arjouni internationale bekendheid verwierf nu in één omnibus kemal kayankaya is privédetective een laconieke sarcastische persoon met een sterk gevoel voor gerechtigheid en een zachtaardig karakter hij is van turkse komaf maar als adoptiekind in een duits gezin opgegroeid en hij spreekt geen woord turks alleen al zijn naam is echter voldoende om zowel wantrouwen als waardering te wekken voor de oriëntaalse man financieel staan de zaken er zelden rooskleurig voor en daarbij slaagt kayankaya er telkens in nog dieper in de problemen te komen geboren en getogen in frankfurt weet arjouni ongelooflijk

overtuigend de onderwereld ervan tot leven te brengen laat niemand hierna nog zeggen dat frankfurt de saaiste stad van duitsland is de kayankaya detectives van arjouni zijn spannend hebben een tomeloze vaart puntige dialogen en ze gaan altijd over net iets meer dan misdaad en gerechtigheid

human speech and music share a number of similarities and differences one of the closest similarities is their temporal nature as both i develop over time ii form sequences of temporal intervals possibly differing in duration and acoustical marking by different spectral properties which are perceived as a rhythm and iii generate metrical expectations human brains are particularly efficient in perceiving producing and processing fine rhythmic information in music and speech however a number of critical questions remain to be answered where does this human sensitivity for rhythm arise how did rhythm cognition develop in human evolution how did environmental rhythms affect the evolution of brain rhythms which rhythm specific neural circuits are shared between speech and music or even with other domains evolutionary processes long time scales often prevent direct observation understanding the psychology of rhythm and its evolution requires a close fitting integration of different perspectives first empirical observations of music and speech in the field are contrasted and generate testable hypotheses experiments exploring linguistic and musical rhythm are performed across sensory modalities ages and animal species to address questions about domain specificity development and an evolutionary path of rhythm finally experimental insights are integrated via synthetic modeling generating testable predictions about brain oscillations underlying rhythm cognition and its evolution our understanding of the cognitive neurobiological and evolutionary bases of rhythm is rapidly increasing however researchers in different fields often work on parallel potentially converging strands with little mutual awareness this research topic builds a bridge across several disciplines focusing on the cognitive neuroscience of rhythm as an evolutionary process it includes contributions encompassing although not limited to 1 developmental and comparative studies of rhythm e g critical acquisition periods innateness 2 evidence of

rhythmic behavior in other species both spontaneous and in controlled experiments 3 comparisons of rhythm processing in music and speech e g behavioral experiments systems neuroscience perspectives on music speech networks 4 evidence on rhythm processing across modalities and domains 5 studies on rhythm in interaction and context social affective etc 6 mathematical and computational e g connectionist symbolic models of rhythmicity as an evolved behavior

how does music shape our experience of time experiencing musical time offers new answers to this question by connecting research on time perception in psychology with ideas from music theory and musicology covering extremes from experiences of timelessness in minimalism and electronic dance music to the subtle feeling of momentum and vivacity in the rhythms of a jazz solo author kristina knowles explains how variations in musical structures influence our experience of time presenting a unique fusion of perspectives experiencing musical time will be insightful for readers in music theory musicology music cognition and cognitive science

extensive research is available on language acquisition and the acquisition of mathematical skills in early childhood but more recently research has turned to the question of the influence of specific language aspects on acquisition of mathematical skills this anthology combines current findings and theories from various disciplines such as neuro psychology linguistics didactics and anthropology

neuropsychiatric disorders such as schizophrenia mood disorders alzheimer s disease epilepsy alcoholism substance abuse and others are some of the most debilitating illnesses worldwide characterizing by the complexity of the causes and lacking the laboratory tests that may promote diagnostic and prognostic procedures recent advances in neuroscience genomic genetic proteomic and metabolomic knowledge and technologies have opened the way to searching biomarkers and endophenotypes which may offer powerful and exciting opportunity

to understand the etiology and the underlying pathophysiological mechanisms of neuropsychiatric disorders the challenge now is to translate these advances into meaningful diagnostic and therapeutic advances this book offers a broad synthesis of the current knowledge about diverse topics of the biomarker and endophenotype strategies in neuropsychiatry the book is organized into four interconnected volumes neuropsychological endophenotypes and biomarkers with overview of methodological issues of the biomarker and endophenotype approaches in neuropsychiatry and some technological advances neuroanatomical and neuroimaging endophenotypes and biomarkers metabolic and peripheral biomarkers and molecular genetic and genomic markers the contributors are internationally and nationally recognized researchers and experts from 16 countries this four volume handbook is intended for a broad spectrum of readers including neuroscientists psychiatrists neurologists endocrinologists pharmacologists clinical psychologists general practitioners geriatricians health care providers in the field of neurology and mental health interested in trends that have crystallized in the last decade and trends that can be expected to further evolve in the coming years it is hoped that this book will also be a useful resource for the teaching of psychiatry neurology psychology and mental health

the impact of training or experience is not the same at all points in development children who receive music lessons or learn a second language before age 7 8 are more proficient as adults early exposure to drugs or trauma makes people more likely to become addicted or depressed later life rat pups exposed to specific frequencies from 9 13 days post partum show expanded cortical representations of these frequencies young birds must hear and copy their native song within 1 2 months of birth or they may never learn it at all these are examples of sensitive periods developmental windows where maturation and specific experience interact to produce differential long term effects on the brain and behavior while still controversial evidence for the existence of sensitive periods has grown as has our understanding of the underlying mechanisms of brain plasticity behavioral evidence from studies of language psychopathology

or vision in humans has been complemented by evidence elucidating molecular gene and hormonal mechanisms in animals it has been proposed that sensitive periods can be both opened and closed by specific experience and that there are multiple overlapping sensitive periods that occur through out development as functions come on line it is also likely that experience dependent behavioral or brain plasticity accrued during one sensitive period can serve as a scaffold on which later experience and plasticity can build based on current knowledge there are a number of broad questions and challenges to be addressed in this domain these include generating new information about the neurobiological mediators of structural and functional changes proposing models of brain development that will better predict when sensitive periods should occur and what functions are implicated investigation of the interaction between experience during a sensitive period and pre existing individual differences and the relationship between experience during a sensitive period and on going experience the goal of this research topic is to bring together scientists in different fields whose work addresses these issues including animal and human developmental neuroscience language and cognitive development education developmental psychopathology and sensory neuroscience
